Enjoy Your Pool More

The best way to protect your pool, your pocketbook and your loved ones is with a Tara Safety Cover. If you own a pool, you should own a safety cover. Designed to fit secure and built to last for years, a Tara Safety Cover delivers peace of mind.

Built to Fit Your Unique Needs

For over 30 years we have specialized in building custom products. Your home, your pool and your needs are unique. We use the latest technology to design a cover that will fit your pool perfectly. A Tara Safety Cover will give you a trouble free pool that looks beautiful all year.

Your safety cover will be designed to secure along raised walls and obstacles so there are no gaps

Our designers use the latest drafting software to translate your pool's measurements into a safety cover that fits your pool precisely

Custom installation and removal tool locks your cover in place

Double layer webbing is used across the entire safety cover

Heavy-duty springs secure the cover to the deck of your pool

Box and X stitch reinforces intersections

Vinyl spring covers protect your deck

Stronger and Safer, Here's Why

No matter which Tara Safety Cover you choose you are sure to be well protected. Strength is built into every pool safety cover we produce. Each one is built with commercial grade hardware and construction techniques. Features like our reinforcing hem around the edges of our fabric panels, double layer webbing across the entire cover, triple stitching and box and x stitched intersections are usually only found on competitor's extreme safety covers. What that means for you, is that your Tara Safety Cover will stand up to the toughest conditions and provide years of solid protection.

Springs

Tara's heavy-duty stainless steel springs are the strongest available. They are 66% thicker than the standard spring used by other manufacturers. They also resist stretching over time, so your cover will stay tight after years of use.

Easy to use D-Ring provides option for strap adjustment

Angled design prevents gaps to keep out wind and debris

Standard Spring Diameter: 0.147"

Heavy-Duty Spring Diameter: 0.177"

Spring covers protect the spring and your deck from wear

Construction

To maximize the strength of the safety cover Tara uses a double layer webbing construction technique that offers superior strength and durability. We begin by adding a 1" hem to each panel. Then sandwich it between two layers of webbing. This incredibly strong seam is then triple stitched together using UV resistant thread. We use this double layer construction across the entire cover. Most other covers manufacturers only use a double layer around the perimeter and 18" from the edge

Top layer of webbing

Triple stitched

Mesh Panel

Mesh Panel

1" Hem around each panel

Bottom layer of webbing

Competitor's Webbing

Double layer all the way across

Double layer 18" in from the edges

Single layer

Hardware

Tara uses stainless steel buckles and springs, which resist corrosion, heat and chemical damage. Brass offers the best resistance to corrosion from chemicals and water, so we use only solid brass for our anchors and end-caps.

Solid brass anchors & inserts

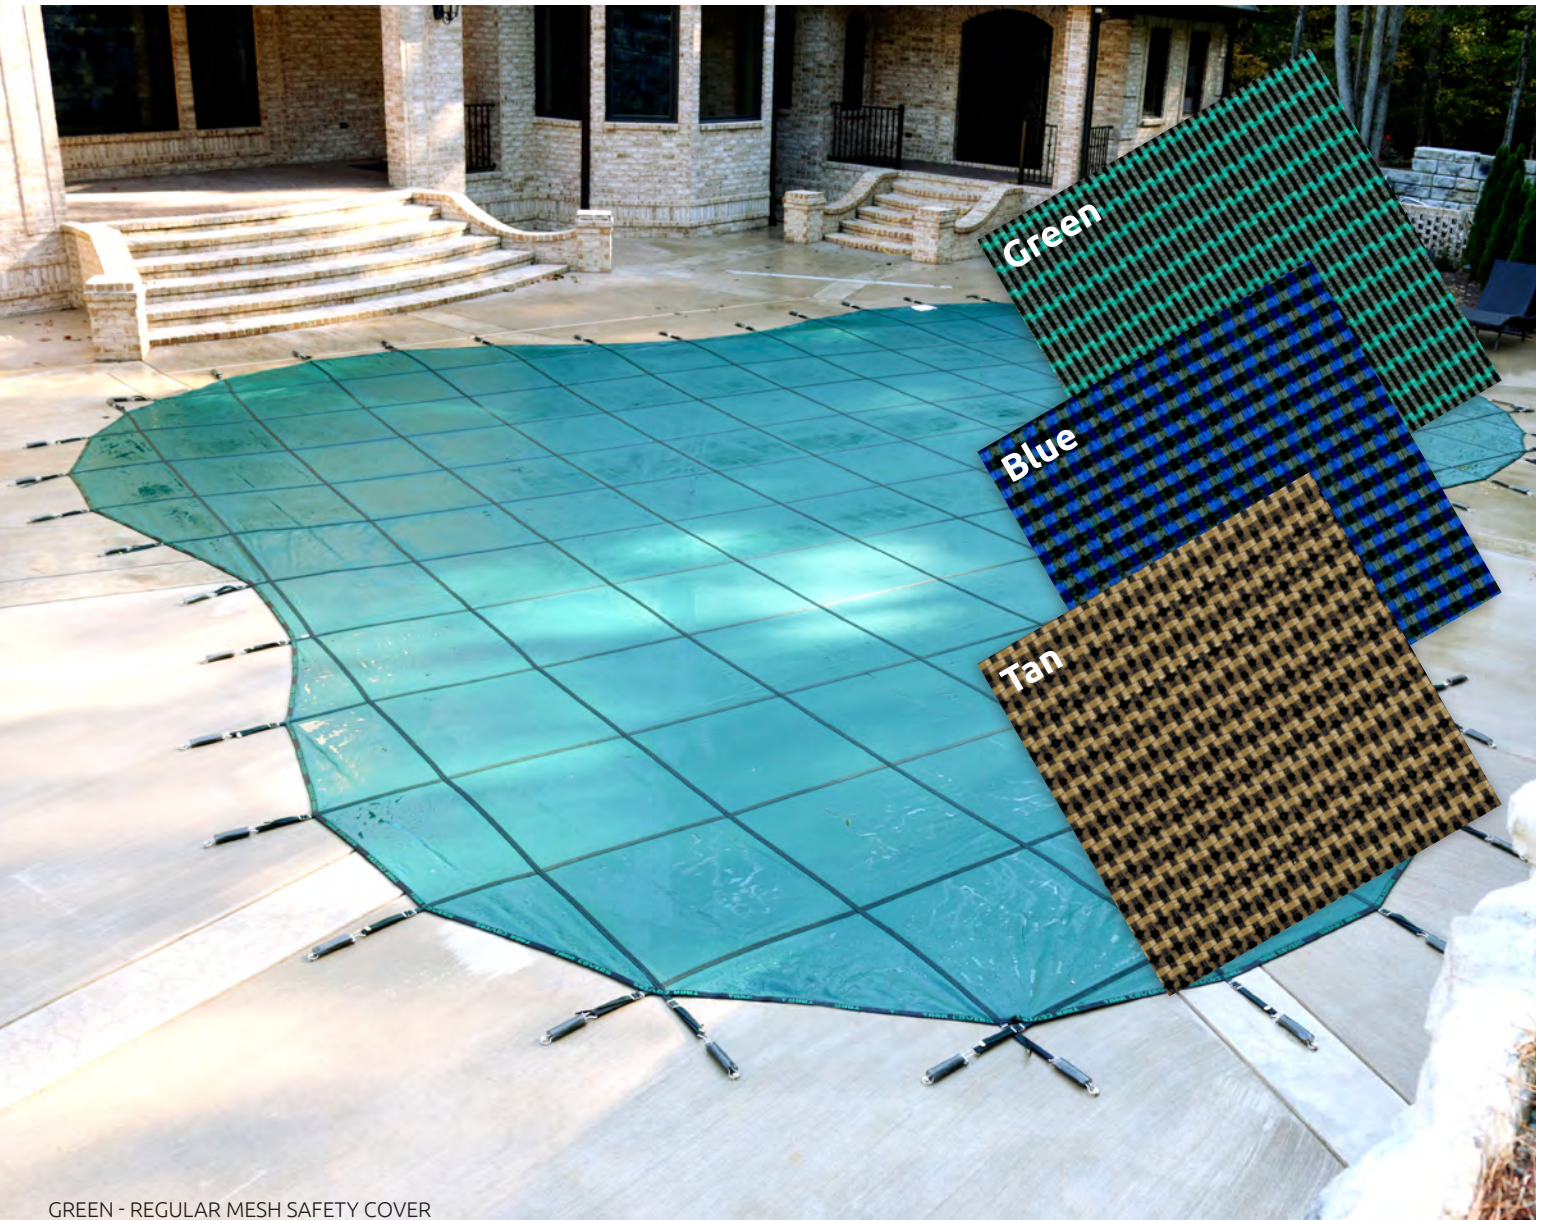

Optional brass anchor flange for additional deck protection

Solid brass end-caps resist corrosion and prevent fraying

Competitor Safety Covers	Tara Safety Covers
0.147" Diameter spring	0.177" Diameter spring
Straight ends on springs	Angled ends on springs
D-Ring optional	D-Ring included
No hem	Hemmed panels
Double layer webbing around perimeter and 18" in from the edge	Double layer webbing around perimeter and across the entire cover

Regular Mesh Safety Covers

Our regular mesh cover offers effective protection at an affordable price. Water drains quickly from the surface, which prevents pooling. That makes it a great choice for families with children and small pets. Because of its light weight, a regular mesh cover is the easiest to handle. The mesh weave keeps out all leaves and debris but allows some dust and smaller particles to pass through. It blocks a good amount of sunlight, 96%. The mesh fabric is made from polypropylene which is impervious to chlorine, mildew resistant, and has an extremely high tensile strength.

GREEN - REGULAR MESH SAFETY COVER

- 96% Shade Factor
- UV Resistant Material
- Fastest Water Drainage - No Pump Necessary
- Reduces Debris
- Lightest Weight - 4.7 oz.
- Easiest to Handle
- High Tensile Strength
- Resists Mildew, Rot and Chemicals

TAN - REGULAR MESH SAFETY COVER

HD Mesh Safety Covers

By choosing an HD Mesh safety cover you get everything you would in a regular mesh safety cover with added sun-blocking and strength. It is just as easy to install and maintain. The densely woven mesh fabric filters out nearly all dust and small particles. It also prevents nearly all sunlight from getting through. HD mesh blocks *99% of sunlight to keep algae from growing. The 7.1 oz. fabric is still lightweight for easy installation and removal. An HD Mesh safety cover satisfies the needs of almost every pool owner.

TAN - HD MESH SAFETY COVER

- *99% Shade Factor
- Enhanced UV-Protection
- Quick Water Drainage - No Pump Necessary
- Reduces More Debris
- Light Weight - 7.1 oz. Mesh
- Easy to Handle
- Higher Tensile Strength
- Resists Mildew, Rot and Chemicals

*HD Mesh U.S. Patent No. 6,886,187 - 99% Shade

Solid Safety Covers

Tara's state-of-the-art solid pool safety cover is incredibly strong and secure. The woven polyester core is laminated between layers of PVC sheets. Designed to resist puncture, this sturdy material also resists chemicals, UV rays and mildew. It provides a durable barrier against the elements. A solid safety cover is the best choice for those who want their pool to stay perfectly clean all winter. It prevents all water, dust and sunlight from entering the pool. An automatic pump or drain panel keeps water from puddling on the surface.

BLUE - SOLID SAFETY COVER

- 100% Sunlight Blockage
- UV Resistant Material
- Low Maintenance
- Prevents 100% of Leaves and Debris
- Keeps Water Clean
- Preserves Pool Chemicals
- PVC Laminated Polyester Weave Resists Puncture
- Sold with Automatic Pump or Drain Panel to Prevent Water Accumulation

Automatic pump included with solid safety covers removes water from the surface.

Choose Your Safety Cover

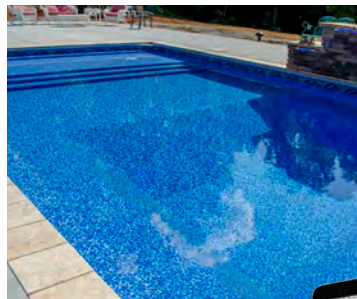

Your Tara Safety Cover is designed to fit your pool perfectly. Choosing the right safety cover will ensure that it also fits your lifestyle. The differences between each type of safety cover include water drainage, sun blocking, pool cleanliness and weight. When you consider how important each of these factors is to you, it's easy to decide which safety cover is best for your needs.

	Regular Mesh	HD Mesh	Solid
Water Drainage	Fastest 40 Gal. Per Minute	Fast 12 Gal. Per Minute	No Drainage Requires Automatic Pump or Drain Panel
Sunblock	96%	*99%	100%
Pool Cleanliness	Moderately Clean Some algae may be present when opening Dust can also filter into the pool	Mostly Clean Low chance of algae Little to no dust will filter into the water	Very Clean There is little chance of algae growth No dust will enter the pool
Weight	Lightest 4.7 oz.	Light 7.1 oz.	Heavy 13 oz.
Warranty	15 Years	15 Years	12 Years
Features	<ul style="list-style-type: none"> • Lightest and easiest cover to install and remove • Keeps out debris • Easy to clean and maintain • Quick water drainage for safety 	<ul style="list-style-type: none"> • Nearly half the weight of a solid cover • Keeps out debris and sunlight to prevent algae growth • Easy to clean and maintain • Quick water drainage for safety 	<ul style="list-style-type: none"> • Keeps out all dirt and debris • Blocks sunlight and water for a clean pool in the spring • Reduces water and chemical use • Includes automatic cover pump available with optional drain panel
